

MaritzCX Employee Engagement Fast Track

Understand and analyze employee engagement to positively impact your employees and customers

The strongest companies embrace their culture and the engagement of people who comprise it. Naturally, most HR professionals lead the process of measuring and surveying employees about their experiences within the organization. Most traditional and effective Voice of the Employee programs focus on learning from employees about several key areas: degree of engagement and commitment to the organization's success; performance climate, including leadership, work environment, communication, and relationships with co-workers; jobs and their "place" in the organization. These components are what organizations look to measure and improve to drive employee engagement which in turn impacts customer loyalty and key business outcomes.

But what most traditional Voice of the Employee (VoE) programs overlook is that those same employees can often tell us a tremendous amount about what customers like and/or dislike and about their company's processes and practices – identifying barriers in providing a positive customer experience and contributing insights into strengthening loyalty.

At MaritzCX – we help our clients ensure that employee engagement measurement garners insights from employees about the customer experience while identifying key drivers in employee engagement.

Employee Engagement Fast Track from MaritzCX will help you:

- Easily measure employee engagement with a pre-built survey template
- Benchmark your organization within your industry
- Drive engaged employees to Glassdoor for improved public perception
- Proactively identify employee suggestions
- Enhance the overall ROI of your customer experience program leveraging employee insight

“Those who have both (engaged employees and customers) command a 23% premium in share of wallet, profitability, revenue, and relationship growth.”

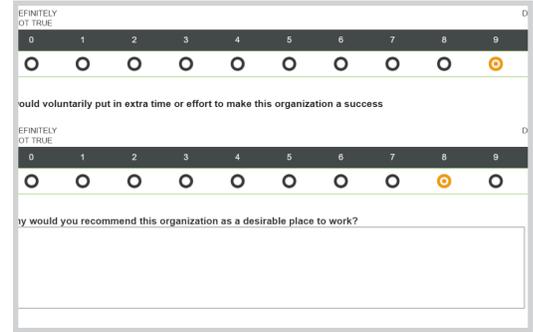

– Manage Your Human Sigma, Harvard Business Review
